IEG-80/70  
10 March 1970

MEMORANDUM FOR: Chairman, ICRS  
THROUGH: Executive Secretary, COMIREX  
SUBJECT: Establishment of Rotational Position on ICRS Staff

1. Per our conversation, I recommend the assignment of an IEG Intelligence Officer to the ICRS Staff on a rotational basis. The assignment would be for a nominal two year period during which time the individual would be carried against an ICRS slot, but would remain a member of the NPIC (IP) Career Service. IEG (NPIC) would be responsible for replacements satisfactory to COMIREX at the expiration of each specific assignment.

2. I believe this rotation would benefit both ICRS and NPIC. IEG will provide ICRS with an individual who has had experience in target requirements, who is knowledgeable concerning the exploitation potential of targets, and the needs of NPIC in answering intelligence requirements. He will also have had experience in preparing COMIREX Form 1's, Field AIF forms, and other COMIREX documentation. IEG will benefit from the increased awareness of COMIREX procedures and the processes leading to COMIREX decisions. Experience gained in this assignment should enable IEG to better advise ICRS concerning collection requirements.

3. Individuals would normally be drawn from our small staff in the Operations Division, IEG, which handles all ICRS collection requirements and EXSUBCOM exploitation requirements. I believe a closer working relationship between these two groups is essential to sound collection decisions and understanding of exploitation requirements.

4. Our candidates for the initial assignment include Messrs.

25X1

5.  joined CIA/Graphics Register in June 1962 having completed four years in the U.S. Navy and having received a BA from the University of Iowa. In January 1965, he transferred to NPIC where he has performed collateral research on a wide spectral of Soviet targets largely in support of first and second phase mission exploitation. He is 36, GS-12, and has received strong fitness reports since 1966.

**SUBJECT:** Establishment of Rotational Position on ICRS Staff

25X1  
6. [ ] is well known to your staff. He joined NPIC in May 1963 after 18 years with the Air Force. For 14 of these years he was directly involved with photo interpretation and targeting. At NPIC he has also been concerned with target handling, much of the detailed NPIC support for ICRS and liaison with DIAAP-8 concerning the assignment of names and BE numbers. He is 47, received a BA from Maryland University in 1964 and has received strong fitness reports since 1965.

25X1  
7. [ ] is also well known to your staff. He joined NPIC in June 1963 after completing four years with the Targets Materials Division with SAC and another 11 years with various Air Force units engaged in the production of target materials. In NPIC he has been concerned with target briefs and maintenance of the COMIREX target file. More recently, he has been deputy chief of the unit supporting ICRS and controlling target header information including liaison with DIAAP-8 concerning names and related BE matters. He is a GS-11, 57, and has received strong fitness reports since 1964. In view of his scheduled retirement in January 1973, I recommend his tour with ICRS not extend beyond 1971.

8. Each of the above individuals is interested in the proposed tour and will welcome an opportunity to discuss the details of the work with a member of your Staff. I realize two of the candidates are GS-12s and your positions are at the GS-11 level but in view of the temporary nature of the assignment I would anticipate no difficulty in effecting a PFA.

9. I have discussed this proposal with the Executive Director, NPIC.

[ ]  
Chief, Imagery Exploitation Group  
NPIC
